SUMMARY

Motivated Computer Engineering student at IOE Pulchowk Campus with hands-on experience building full-stack web applications using React.js, Django, and REST APIs. Passionate about scalable software solutions, clean code, and solving complex engineering challenges. Seeking a software engineering role to contribute to impactful, large-scale systems.

EDUCATION

Institute of Engineering (IOE), Pulchowk Campus

Bachelor of Engineering in Computer Engineering

Lalitpur, Nepal

2021 – Present

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Web Design, DOM Manipulation, Vanilla JS

Backend: Django, Django REST Framework, RESTful API Design

Tools & Platforms: Git, GitHub, Vercel, Third-Party API Integration, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, MVC Architecture, Asynchronous Programming

PROJECTS

Portfolio Website | [React.js](#), [Tailwind CSS](#) | [Live](#) | [GitHub](#)

2024

- Designed and built a personal portfolio website using React.js and Tailwind CSS, showcasing projects, skills, and experience with a clean, modern UI.
- Leveraged Tailwind CSS utility classes to implement a fully responsive layout that adapts seamlessly across mobile, tablet, and desktop viewports.
- Deployed on Vercel with continuous deployment from GitHub, enabling instant updates on every push to the main branch.

Amazon Clone | [HTML](#), [CSS](#), [JavaScript](#), [Django](#) | [Live](#) | [GitHub](#)

2024

- Built a full-stack e-commerce web application replicating core Amazon features including product listings, shopping cart, and user authentication using Django on the backend.
- Developed a dynamic, responsive frontend with vanilla HTML, CSS, and JavaScript, handling DOM manipulation, event-driven interactions, and real-time cart state updates without a frontend framework.
- Designed Django views and URL routing to serve data and handle form submissions, demonstrating end-to-end full-stack ownership from database to UI.

Chatbot | [React.js](#), [JavaScript](#), [Third-Party AI API](#) | [Live](#) | [GitHub](#)

2024

- Built a conversational AI chatbot with a React.js frontend that integrates a third-party AI API to generate intelligent, context-aware responses in real time.
- Managed multi-turn conversation state using React hooks, maintaining chat history across user sessions for coherent dialogue flow.
- Implemented asynchronous API communication with proper error handling and loading states, delivering a seamless and responsive user experience.

Rock Paper Scissors | [HTML](#), [CSS](#), [JavaScript](#) | [Live](#) | [GitHub](#)

2023

- Developed an interactive browser-based Rock Paper Scissors game with real-time score tracking and randomized computer opponent logic using pure JavaScript.
- Applied core web development fundamentals including DOM manipulation, event listeners, and conditional game logic entirely in vanilla JS without external libraries.
- Crafted a clean, responsive UI with CSS styling ensuring a consistent experience across different screen sizes and devices.

ACTIVITIES & ACHIEVEMENTS

IOE Pulchowk Campus

Computer Engineering Student

Lalitpur, Nepal

2021 – Present

- Actively participated in coding competitions, hackathons, and technical workshops focused on software development and problem solving.
- Collaborated in team projects applying Agile development practices, version control with Git, and peer code review.
- Continuously expanded skills through self-directed learning in full-stack web development, building and deploying projects on Vercel.
